Rising senior computer science major with progressive experience writing code & designing solutions. Seeking a challenging role as a Software Engineering Intern. Adept at working effectively in faced-paced, deadline-driven settings that demand organizational and analytical skills.

EDUCATION

University of New Hampshire | Bachelor of Science in Computer Science.

August 2020 - May 2024

- **GPA:** 3.45/4.00
- **Relevant Coursework:** Algorithms, Data Structures, Introduction to Software Engineering, Mathematical Proofs, Assembly Language Programming & Machine Organization, Cybersecurity, Calculus 2, Statistical Analysis, Digital Systems, O-O Design, and Development, Operating Systems, SQL, Functional Programming.
- Fall 2020 Dean's List (High Honors) • Spring 2021 Dean's List (Honors)

Publication: (In • de • pen • dent) • Personal narrative essay selected to be published in *University of New Hampshire Transitions: 2021-2022*.

WORK EXPERIENCE

Software Development Intern

May 2023 - August 2023

Ally Financial | Charlotte, NC

- Collaborated with other developers and provided significant contributions to develop microservices in a secure, well-Tested, and performant way.
- Designed and architected solutions for existing microservices as they are moved into cloud environments, such as **AWS** using **Terraform**.
- Unit-tested code for robustness, usability, and general reliability using tools such as **Postman**, **Tomcat**, and **JUnit**
- Successfully deployed production level microservices on an enterprise scale.
- Tackled technical problems of high scope and complexity.
- Gained experience in developing an enterprise grade API integration layer and web applications using **Spring Boot** with **Java & Oracle**, including technologies such as **Maven**, **Hibernate**, **Apigee**, and protocols such as **REST** and **SOAP**.
- Actively collaborated with Scrum Master, POs, managers, and lead engineers to iterate on new features.
- Participated in the refinement of Epics, Stories, and Tasks in **Agile** sprints using tools such as **Jira** and **Confluence**.
- Gained a deep understanding of application architecture and development in Service Oriented models.
- Crafted code that meets internal standards for reusability, style, maintainability, and secure standard processes.

IPv6 Technician Intern

February 2022 – May 2023

University of New Hampshire InterOperability Lab | Durham, NH

- Tested & certified hosts and routers relative to **ISO/IEC 17025** regulations in order to accelerate the adoption of IPv6 technology.
- Interacted with members of the Mobile and Data Communications vendor community.
- Coded device drivers using scripting languages such as **Tcl** and **Expect** to test IPv6 device commands and their functionality.
- Used different operating systems such as **Mac OS & CentOS** to initialize devices for testing.
- Attended daily scrum meetings to discuss updates.
- Performed detailed conformance and interoperability-based testing of existing and prototype products.
- Debugged, troubleshooted, and provided general assistance throughout the agile test cycle using tools such as **Jira** and **Confluence**.
- Wrote detailed conformance and interoperability reports within the given timeframe.

TECHNICAL SKILLS

Programming Languages: Java, C++, C, SQL, HTML, CSS, Python, JavaScript, C#, PHP, Tcl, Expect, Angular

Operating Systems: Mac OS X, Linux/Unix, Windows, CentOS

Development Tools: GitHub, Gitlab, Jira, Confluence, Docker, Jenkins, Azure, Terraform, AWS, Adobe Suite, Tomcat, Microsoft Office

IDEs: IntelliJ, Spring Boot, PyCharm, CLion, Android Studio, Visual Studio Code

Certificates: Learn TTD in Java, Master Java Web Services and REST API with Spring Boot, Terraform for AWS

PROJECTS

BulletZone: Full Stack Engineer

August 2022 - November 2022

- Worked with six team members to design and develop an **android application** called "BulletZone" for android tablets, and mobile phones in **Java** and **Python**.
 - An action tank game supporting global multiplayer, personalized accounts and many more features.
- Exposed multiple **RESTful APIs** for the client to interact with.
- Implemented code using several software design methodologies such as builder pattern and observer pattern.
- Used **SQLite** to store database metadata needed for both client and server side.
- Developed code for frontend and backend systems using agile development methodologies.
- Created documentation such as subsystem designs, use cases, and sequence diagrams to explain the logic behind the implementation and design.
- Unit-tested code for robustness, usability, and general reliability using tools such as **Postman**.

LEADERSHIP & EXTRACURRICULARS

Intramural Basketball Team: University of New Hampshire

Dec 2021 & Nov 2022

Assistant Instructor: KUMON | Nashua, NH

Nov 2019 - Dec 2020

Student Mentor: STEM buds | Nashua, NH

Nov 2018 - Mar 2020
