Experience

Full Stack Software Engineer | Fidelity Investments, Merrimack, NH

Oct 2024 – Present

- Developed and maintained scalable backend services and REST APIs in Java (Spring Boot) and Python for a dual-region AWS EKS platform integrating Amazon S3 and Snowflake, supporting applications processing millions of requests daily.
- Designed, deployed, and maintained containerized microservices on AWS EKS (Kubernetes), working directly with production clusters, cloud-native infrastructure, and high-availability service deployments.
- Built and maintained Apache Kafka event-driven workflows processing hundreds of thousands of messages, enabling scalable asynchronous communication between distributed backend services.
- Built and maintained CI/CD pipelines using Jenkins and Groovy, automating build, testing, deployment, and release workflows for production applications.
- Maintained 80%+ automated test coverage using JUnit, Pytest, Karate, Sealights, and SonarQube, improving software quality, enforcing code standards, and reducing production regressions.
- Optimized backend performance and API throughput, improving response times by 70% through performance tuning, architectural enhancements, and backend service optimization.

LEAP Program – Associate Full Stack Software Engineer | Fidelity Investments, Merrimack, NH

Jun 2024 – Oct 2024

- Built 3-tier applications with Angular, Spring Boot, and Oracle SQL; integrated RESTful APIs.
- Practiced CI/CD with Jenkins Core and GitHub workflows; deployed to dev, QA, and prod environments.
- Applied secure coding and testing practices with JUnit, Cucumber, and Angular Testing Library.

Software Development Intern | Ally Financial, Charlotte, NC

May 2023 – Aug 2023

- Developed microservices using Java, Spring Boot, and Oracle; integrated with REST and SOAP APIs.
- Migrated legacy services to AWS using Terraform.

IPv6 Technician Intern | UNH InterOperability Lab, Durham, NH

Feb 2022 – May 2023

- Conducted IPv6 conformance and interoperability testing on network devices following ISO/IEC standards.

Projects

CareerOS | Java, Spring Boot, PostgreSQL, Flyway, Next.js, TypeScript, Tailwind, Anthropic Claude API, Chrome MV3, Vercel, Railway

- Built a full-stack job application platform using Java 21, Spring Boot, PostgreSQL, and Next.js 14, deployed on Railway and Vercel.
- Implemented AI resume tailoring with the Anthropic Claude API, generating a per-job one-page resume exported to ATS-safe PDF and DOCX via Apache PDFBox and POI.
- Wrote 350 automated tests using JUnit, Vitest, and React Testing Library across 32 Flyway database migrations.
- Designed application tracking with status history, immutable resume snapshots, and .ics calendar export, secured with Spring Security and Spring Session JDBC.

USNH myPortal Widget Suite | JavaScript, Scala, HTML, CSS, REST API, RSS Feeds

- Designed and built a suite of custom widgets for USNH's student portal, including a radio stream, live bus tracker, dining hall menus, and athletics
- Developed using JavaScript, Scala, HTML, and CSS with API integrations and caching strategies to streamline data delivery.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL, Scala

Technologies: Spring Boot, AWS, Docker, Jenkins, GitHub, SonarQube

Certifications: Learn TTD in Java - Udemy, Master Java Web Services and REST API with Spring Boot - Udemy, Terraform for AWS - Udemy

Education

University of New Hampshire, Durham, NH

Aug 2020 – May 2024

Bachelor of Science in Computer Science

Honors: Fall 2020 Dean's List (High Honors), Spring 2021 Dean's List (Honors), Fall 2023 Dean's List (Honors).

Publications

Publication: (In • de • pen • dent) Personal narrative essay published in University of New Hampshire Transitions: 2021-2022.
